DESCRIPTORS	Automatic Indexing, Automation, *Cataloging, *Classification, Indexes (Locaters), Indexing, *Information Retrieval, Instructional Media, Library Collections, *Library Technical Processes, Reference Materials, *Slides

ABSTRACT

Almost all disciplines make extensive use of the resources provided by slide libraries and picture collections. Growing demands for pictorial material have stimulated a concern for making slide and picture collections more useful and more usable by better physical arrangement and more thorough indexing. The system provides a classification scheme for the organization of general collections of slides and pictures with a broad subject coverage as opposed to the more typical slide classification system which deals with a single subject field. A suggested method of automatic indexing is included. This document will be useful to builders of general collections, and is published as a tool for libraries and other collectors of slides and pictures who have had no ready-made system of classification available. ACKNOWLEDGEMENTS

The development of this classification scheme was carried out during 1968 and 1969 under two grants from the Council on Library Resources. This publication marks the completion of the second phase of the project. We express to the Council our thanks for their confidence in our proposal.

We would like to acknowledge the faithful and thoughtful work of the project staff -- Josephine Bow, Sara Campbell, Beverly Holbrook, Sally Tingley, Marie Wallace, and Susan Wooster -- all of whom contributed valuable ideas and many hours of patient work. Thanks are also due to volunteers Don and Mary Weed.

We would also like to acknowledge substantive contributions to the body of the work by colleagues in many states and several foreign countries -- artists, curators, historians, librarians, media specialists, scientists -- G. Thomas Basler, H. G. Dowling, Dorothy Fulton and Hobart van Deusen, *American Museum of Natural History, New York;* Charles E. Engel, *British Medical Association;* Carroll H. Weiss, *Camera M. D. Studios, New York;* Ernest H. Boldrick, *General Dynamics, San Diego;* Cynthia Clark and Wolfgang Freitag, *Harvard University, Fogg Museum;* Priscilla Farah and Margaret Nolan, *Metropolitan Museum of Art, New York;* Lucille Emil, *National Aeronautics and Space Administration, Mountain View, Calif.;* Guido Schoenberger and Craig Hugh Smyth, *New York University Institute of*

Fine Arts; Kazuko Higuchi, *Princeton University;* Lynn A. Griner, *San Diego Zoological Gardens;* John R. Chipman, Albert Miller and Bill Raub, *San Jose State College;* Mina Steinmuller, *U. S. Naval Electronics Laboratory, San Diego;* Elaine Davis and Joan Joy, *University of California, Berkeley;* Catherine Borka, Esther McCoy and Jean Moore, *University of California, Los Angeles;* Barbara Maxwell, *University of California, Riverside;* Alfred Strohlein, *University of California, San Diego;* Nicholas Burgoyne, Elizabeth Spedding Calciano, Thomas Kinman, John Knapp, Todd Newberry, Bruce Rosenblum, Michael Starzak, Aaron Waters and Rulon Watson, *University of California, Santa Cruz;* Mary Meihack and Dimitri Tselos, *University of Minnesota;* Anthony Croghan, *University of Sussex;* L. D. Brown and Brendan Kelly, *University of Toronto;* E. P. van den Heuvel, *Utrecht Observatory;* and Jeanne Harris, *William Rockhill Nelson Gallery of Art, Kansas City.*

And our special thanks to Donald T. Clark, University Librarian, *University of California, Santa Cruz,* for his encouragement and for his willingness to have the library's time and resources expended on the project.

THE NEED FOR A NEW CLASSIFICATION

Since the advent of television, pictorial materials seem to have taken on even greater importance to teaching in fields outside the normal visual world of the arts. History, anthropology, psychology, the sciences -- almost all disciplines make extensive use of the resources provided by slide libraries and picture collections. Growing demands for pictorial material have stimulated a concern for making slide and picture collections more useful and more usable by better physical arrangement and more thorough indexing. It is to this end that the development of this system is directed.

This is a classification scheme for the organization of general collections of slides and pictures. The term general is used to denote broad subject coverage and to make a clear differentiation between the scope of this work and the more typical slide classification system which deals with a single subject field, such as art. A preliminary edition of this work, which was distributed in January 1969 to a limited audience, was titled A Universal Slide Classification System. Universality of subject coverage is the ultimate goal, but use of that term at this stage of development might suggest too great a claim for what has been accomplished.

The classification system was developed at the University of California, Santa Cruz in response to a local need but with the hope that the product would meet the needs of many libraries. Eighteen months of intensive work on the project was supported by grants from the Council on Library Resources.

The basic requirements for a system that were set down before

developmental work began were these:

1. The collection, and hence the classification, should be general, encompassing the subject matter of all academic disciplines.

2. The arrangement of the collection should reflect a broad historical, cultural approach to teaching.

3. The filing arrangement of the collection should encourage and facilitate browsing, that is, visual inspection and comparison in the files.

4. In addition to being filed for easy browsing, the collection should be fully cataloged or indexed, preferably by automated means.

To the best of our knowledge or ability to discover no existing slide or picture classification system fulfilled all these requirements, particularly those of generality and indexability.

INTELLECTUAL CONTENT VS. VISUAL CONTENT

Why could not an existing general classification scheme for books be used for slides and pictures? There is an essential difference. A picture is more analogous to a sentence or a single word than to a book. It makes a single statement on a single theme; a book can be encyclopedic in its coverage or very narrow. Book classifications provide for the very general, the very specific, and everything between. Classification of slides and pictures can make use of only the most specific.

A picture cannot in itself develop a train of thought or a continuity of ideas. A series of pictures (motion pictures, filmstrips or picture sets) can easily be classified using the basic tools designed for book classification. But a single picture or slide is a static object without any function of sequence or continuity. Books can develop and deliver an explicit message; a picture's message is entirely in the "eye of the beholder", subject to many varying and even contradictory interpretations, particularly as it

is placed in varying sequences with other pictures.

Meaningful classification of pictures, then, demands reliance not on intellectual content of the picture, which is entirely subjective and dependent upon sequential development, but upon the visual content which can more nearly be described with objectivity. For instance, a president of the United States may be photographed while delivering to a college graduating class an address on farm policy. This could be construed as illustrating an aspect of education or of agriculture, and would be so construed by persons with special points of view. But the visual content of the picture is the president himself and the picture becomes a biographical statement about him. It belongs more properly with all other pictures of the man and his presidency than it does with the subject on which he spoke, or the locale of his rostrum.

The possible range of visual content is simply not as broad as the range of verbal content in books-- emotions, thoughts, concepts, imagination, speculations; these cannot become the visual content of a picture. The greater part of a typical book classification system therefore has no meaning for picture classification. A portion of one typical schedule from the 15th Edition of Dewey will illustrate the point:

320	POLITICAL SCIENCE
.1	Political Theory
.15	Origin and Nature of State
.157	Sovereignty
.158	Unity
.9	History of Political Science and History
321	FORM OF STATE AND GOVERNMENT
.01	Representative and Non-representative Government
.02	Unitary and Fedral Government
.021	Federal State

.04 World State
.07 Ideal State
.09 Change of Form of State

...etc.

A text written on any of these subjects could be profusely illustrated with related pictures but in no case could the listed subject be the visual content of a picture. A sovereign, yes -- but the concept of sovereignty, no. This will be true of most of the schedules used for book classification. A classification for visual phenomena must be cast in very concrete terms and this is why it appears necessary to create a separate and special classification system for slides and pictures.

A BASIC HISTORICAL APPROACH

A picture cannot depict the essence of theoretical subjects such as political science, education, religion, philosophy, etc. but only some isolated visual phenomenon -- an event, a person, a place, a thing -- phenomena that exist in an historical context rather than a theoretical one. The prime delimiters of historical context are time and place, and so time and place are given precedence over subject matter in the classification of pictures or slides. Most of the major subject classes found in the commonly-used book classifications will be found in this scheme, but found occupying a subservient place rather than a primary one.

The primacy of the historical factors reflects not only the inherent qualities of pictorial material, but also a basic need of the academic program at the University of California, Santa Cruz. Many of the "core" courses on this campus make a very broad cultural sweep through "Western Civilization", "Culture and Society", "Cosmos and the Arts", "The Third

World", etc. The interdisciplinary approach to the study of man and the humanities is apparently becoming more widespread. This classification system is designed to serve that trend. Every aspect of life in any particular era or culture is readily discovered in the file; cultures are easily compared and the whole movement of human history is laid out in a logical flow from past to present, from ancient to modern.

Every photograph is, in a very real sense, an historical document for it records some instant, some event, some situation, some person or thing, or some work of art at a particular time and place. Whatever was at that instant is captured on film to stand as an unalterable record of that instant. Representational art likewise serves as a direct documentation of history. Even non-representational art stands as an indirect document because it is a reflection of the culture that spawned it.

ART AND SCIENCE

In all the discussion to this point, it has been implied that pictorial matter of any sort is equally treated from the historical point of view. In fact, the classification is seen to have three basic divisions, History, Art and Science. In the beginning, it must be understood that History is a very inadequate term where it is used to label the first third of the classification. Its definition encompasses all subject matter except Art and Science (which have been pulled out as special cases) but reflects the fact that all the included subjects are expressed in an historical context.

Art is a special facet of History. Though the subject content of art may run the gamut from utilitarian artifact to completely imaginative abstraction, it still is a statement of its time and culture. Art has been assigned a large share of the notation capacity in the classification because it seems probable that in any truly general collection, art will be a dominant portion of the collection. Art could have been listed as a subject subdivision in the Historical portion of the classification, along with Agriculture, Business, etc., but this would have limited the potential capacity of the system.

Art has been placed parallel to History for another reason. In classifying art we observe some subtle variations in the principle of using visual content for the basis of classification. The visual content of a still life may be a bowl of fruit, but the primary concern is not with the painted subject content but rather with the fact of the painting. A photograph of the Parthenon, even though a record of conditions in the twentieth century, is placed in the Ancient period of Greek Art because our predominant interest is in the creation of the work, not in the later record of it. So in these two examples we see that the work of art itself is considered the visual content and classification centers on when, where, in what medium and by whom it was created.

Science requires yet another treatment. The principles of pure science know no age or national origin and cannot be compartmentalized chronologically or geographically. Therefore, they cannot be treated in the basic historical approach used for History and Art. The primary divisor in Science is

subject. In this the classification does not differ greatly from book classification, but an effort has been made to identify terms that are most meaningful to a pictorial collection. In the field of Science the diagrammatic representation of formulae and principles make the use of theoretical subject terms more possible than in the social sciences or humanities.

The discovery of scientific principles, however, can be described in terms of time and place. This forces the difficult choice of whether to class the act of research and discovery with the theoretical science or whether to place it in the historical context in which it occurred. The scheme is constructed to accommodate either approach; preference is given to including research with the theory while placing the end product, the application of science, in its historical environment.

USE OF THE SYSTEM

In making use of the classification, probably the most difficult decision to be made is the first, that of determining in which of the three primary categories a picture should be classed -- History, Art or Science. A sample list of questions is given below to suggest a method for arriving at the primary determination. Ask questions in the order indicated until a "yes" answer results. Go no further.

1. (Assuming some special local-interest archive) Does the slide or picture illustrate any aspect of the history, the people, the environment of the local community or home institution? If no -- proceed to next question. If yes -- class in History using special geographical tables that must be created to suit local conditions.

2. Is it a map of an identifiable locale on the Earth? If no - proceed to next question. If yes - class in History. (Extra-terrestrial maps are treated as Astronomy. Theoretical or unidentifiable maps of earth formations may be treated as Earth Sciences.)

3. Is it a work of art? If no - proceed to next question. If yes - class in Art. (Some items may be physically works of art, that is not produced by a camera, but be deemed to have no artistic merit. In such case the items may be considered in light of their historical or scientific content. On the other hand a photograph may be classed as Art if its subject content is indefinable or is clearly subordinate to its artistic qualities.)

4. Does it illustrate the theoretical principles of science, or the intellectual processes of scientific or technological research? (Not the end products of technology, since these are a part of the human environment.) If yes - class in Science. If no ---

5. Anything left over should illustrate some aspect of the history of man, his natural or artificial environment, his institutions, his activities -- class in History.

History remains the miscellaneous catch-all at the bottom of the list. Since the historical approach is the primary approach of the whole system, everything is thus classed as history that cannot be positively identified as an exception.

The questions and their order reflect the collecting policy of the University of California, Santa Cruz Library. Each user should create his own priorities to suit local conditions. Many variations are possible in the application of the system. Even though the classification has been constructed with a basic hierarchy of time, place, and subject (or art medium) in that order, other patterns may be created with great ease. To accommodate local priorities other libraries may choose to rearrange the primary elements of the notation to bring geographical division, subject matter, art media or any other facet to a more dominant position.

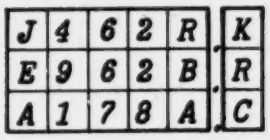
Similarly, History and Art can be more closely integrated by rearranging the prime chronological schedules thus:

(As published)	(Alternate arrangement)
HISTORY	PREHISTORIC
	A History
A Prehistoric	B Art
B Ancient	ANCIENT
C Medieval	C History
D 15th-16th Centuries	D Art
E 17th-18th Centuries	MEDIEVAL
F 19th Century	E History
G 20th Century	F Art
H 21st Century	15th-16th CENTURIES
	G History
ART	H Art
	17th-18th CENTURIES
I Prehistoric	I History
J Ancient	J Art
K Medieval	19th CENTURY
L 15th-16th Centuries	K History
M 17th-18th Centuries	L Art
N 19th Century	20th CENTURY
P 20th Century	M History
Q 21st Century	N Art
	21st CENTURY
	P History
	Q Art

The fully developed call number consists of 18 digits arranged in three horizontal rows of six each. (figure 1) Many libraries may find that the top row is enough to provide the differentiation they need for a small collection. The top row is roughly analogous to the classification number in book classification, the second row to author mark, and the third row to title mark. In History the first six digits delineate chronological period, place and subject; in Art they delineate period, place, medium and style; in Science, subject and where applicable, place.

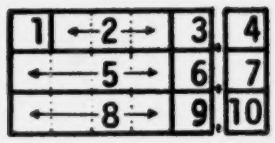
If a one-line call number is assigned, further control of filing is achieved by filing alphabetically the first word spelled out on the slide label. Since this is the word ordinarily coded in the next call number

Figure 1



The Configuration of the 18-digit Call Number.

Throughout the classification schedules that follow, a block diagram of the call number (similar to this Figure) occurs in the upper right-hand corner of each page. Each diagram identifies the element of the call number that is treated on that page and, in flipping the pages, the blocks serve as a visual guide for finding various schedules quickly. The 18 digits comprise 10 Sort Fields (as shown below) and the classification schedules are organized in the order of their corresponding Sort Fields.



field, the resultant order is the same.

When the full 18-digit call number is used there will be instances where each of the three rows is not filled out completely. Elements of the call number may be dropped from the right-hand end of the row but it is important for filing that whatever elements are used be continuous from the left in each row. For the sake of machine sorting, like elements must be kept in their assigned fields.

CAVEAT

This is not a classification of knowledge, but a structuring of that knowledge that appears capable of pictorial representation. It is not complete. It should not prove useful to collectors of specialized picture collections except as a method for organization and a skeleton upon which to add flesh. Hopefully, it will prove very useful to builders of general collections. It is published as a tool for libraries and other collectors or slides and pictures who have had no ready-made system of classification available before. Every user will expand and improve it.

A SUGGESTED METHOD OF AUTOMATIC INDEXING

Ease of cataloging or indexing was one of the basic goals in the development of the Santa Cruz Classification. An automated indexing method was developed concurrently with the classification system that yields catalog-type data as a by-product of classification. The method was designed to force a maximum output in natural language listings from a minimum input effort, utilizing only one punched card per slide. It is described on the following pages as a method, but is not necessarily recommended as the only method. It is, essentially, a method of printing indexes or finding lists to the collection.

If a traditional library approach to cataloging is preferred, it is recommended that use be made of the American Library Association's Anglo-American Cataloging Rules, Library of Congress Subject Headings, and the MARC II format for organizing information for data processing applications. The advantages would be (1) machine-readable data completely compatible with data describing other media, an important point if a library is considering a combined catalog of all media, both print and non-print, and (2) standardization in a cataloging system that has national and international acceptance in the book world and is gaining adherents in the audio-visual field. A disadvantage would seem to be a more costly cataloging process, one out of scale with the relatively low cost of the item being cataloged. Use of Library of Congress cataloging techniques, however, does not require the use of Library of Congress Classification. The Introduction to this work outlines the reasons

why the authors are convinced that the L. C. Classification is not useful for slides or pictures.

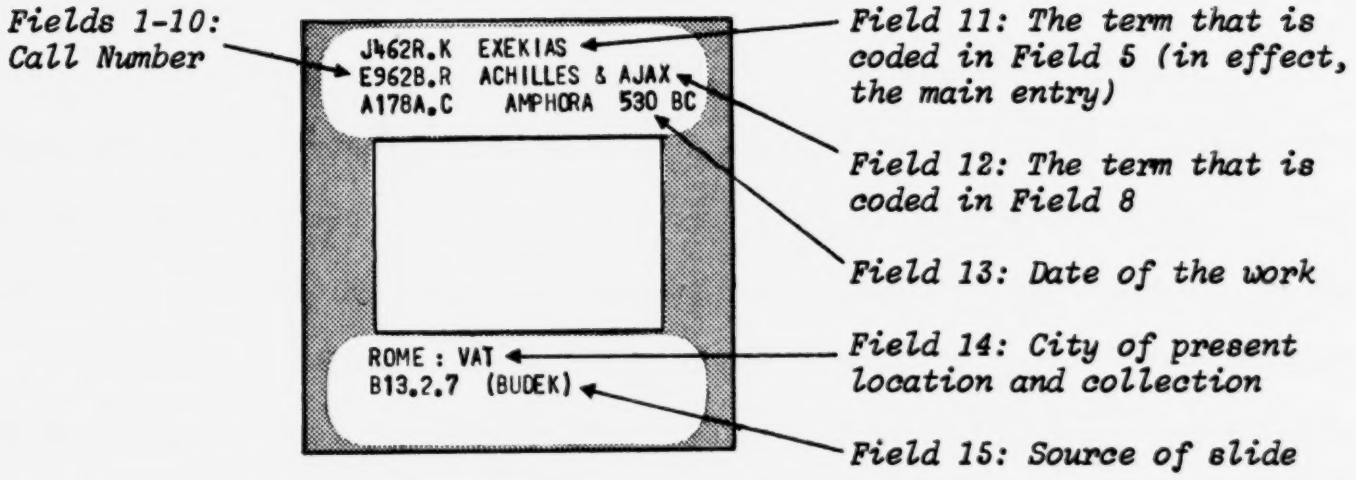
A totally different method for the retrieval of slides has been devised and tested by Dr. Robert M. Diamond, Director of the Instructional Resources Center, State University College, Fredonia, New York. Diamond's approach is to assign descriptive "identifiers" to each slide; unlimited numbers of identifiers can be given to any one item. The searcher queries a computer or other retrieval device with the code numbers of the identifiers he is interested in and receives, in return, a coded list of slides that have the desired characteristics. All information is coded and stored mechanically; no natural language catalog or index to the collection results from the process.

Any method of cataloging, indexing or retrieval can be used in conjunction with the Santa Cruz Classification without altering its primary usefulness as a tool for file organization. As an example, though, the Santa Cruz method for creating automatic indexes is described as follows:

The typical 2 x 2 slide with an aperture of 1-3/8 x 7/8 has space for two labels measuring 1-3/4 x 1/2. The top label bears the call number and descriptive information about the content of the slide. The bottom label contains additional information about the location of the object pictured and the source of the slide. (Figure 2)

Each bit of information recorded on the slide labels is also assigned to a corresponding field on a key-punch card. The format of the card has been designed to provide for sorting potential beyond that inherent in the call number. (Figure 3)

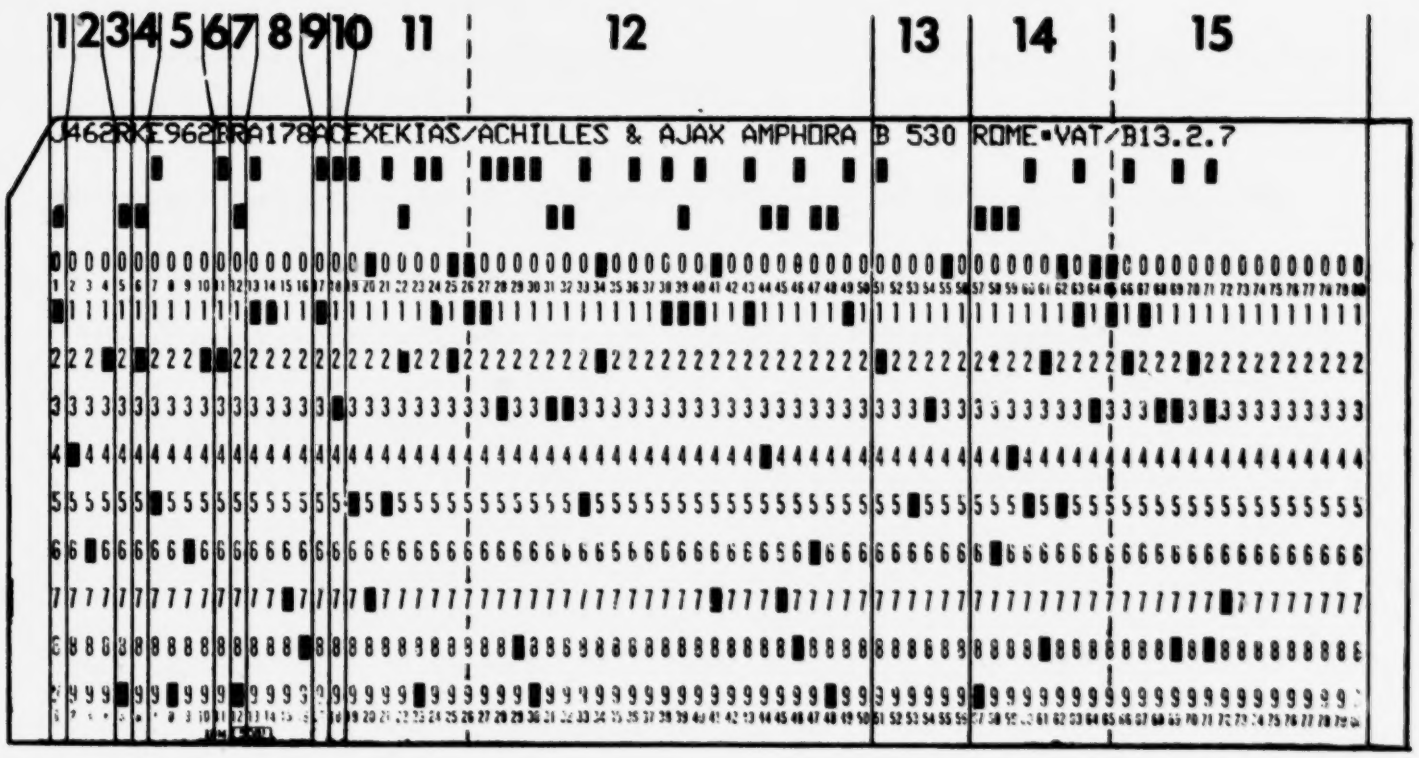
Figure 2



Fields 1-10:
Call Number
J462R.K EXEKIAS
E962B.R ACHILLES & AJAX
A178A.C AMPHORA 530 BC
ROME : VAT
B13.2.7 (BUDEK)
Field 11: The term that is coded in Field 5 (in effect, the main entry)
Field 12: The term that is coded in Field 8
Field 13: Date of the work
Field 14: City of present location and collection
Field 15: Source of slide

A typical slide, fully labelled.

Figure 3



The layout of the punched card, showing the 15 Sort Fields.

The encoded information for the sample slide, a Greek vase painting, reveals the following about the slide:

Field 1 -- (J) places the work in the Ancient period of Art History, from the beginning of historic dating to the 3rd Century A.D.

Field 2 -- (462) geographical code for Greece.

Field 3 -- (R) identifies the art medium as ceramic or glassware, done by a known artist.

Field 4 -- (K) denotes the Archaic style in Greek art, 600-480 B.C.

Field 5 -- (E962) Cutter number for the artist's name, Exekias.

Field 6 -- (B) identifies the Greek vase shape as an Amphora.

Field 7 -- (R) identifies the subject matter depicted on the vase as Mythological.

Field 8 -- (A178) Cutter number for the first word in the title of the work, "Achilles and Ajax Amphora."

Field 9 -- (A) indicates that the picture is a view of the entire work.

Field 10 - (C) indicates that this is the third slide in the file of this view.

Field 11 - (EXEKIAS) the artist's name spelled out in full for visual scanning of the index. Field 5 provides the means for mechanical sorting and retrieval.

Field 12 - (ACHILLES AND AJAX AMPHORA) the title in full for visual scanning of the index. Field 8 provides for mechanical sorting and retrieval.

Field 13 - (B530) date of the work, read as 530 B.C. Since no hyphen follows the date it is understood to be a firm date and not an approximation.

Field 14 - (ROME:VAT) indicates that the present location of the work is in Rome at the Vatican.

Field 15 - (B13.2.7) reveals the commercial source of the slide as Budek and the gives the firm's catalog number.

Fields 9 and 10 are devices for arranging a multiplicity of slides of the same object in some meaningful order in the files, but these two fields

have little use as indexing devices. Fields 11 and 12 give the index user an "author-title" display in natural language and are not intended for mechanical sorting. All other Fields, however, have important potential for generating printed indexes to the collection.

Fields on the key-punch card are fixed except that a variable divider (diagonal line or slash) separates Fields 11 and 12; another separates 14 and 15. These two floating dividers allow better utilization of the very limited space on an 80-column card. Together the terms in Fields 11 and 12 may occupy 32 columns of the card. If one term is short, the other may be lengthened to fill out the space and thus record fuller information. The same is true of Fields 14 and 15. In printing, the 80 columns of punched data are expanded to 120 columns in the print format. This allows adequate spacing to make the printed lists more readable. The computer is programmed to react to the floating dividers (slashes) by moving the following character over to a fixed print field that will line the word up with others above it. (Figure 4)

Whenever possible, a date is entered in Field 13 to indicate the year of the event pictured or the date of the creation of a work of art. If the date is an estimate, or if a span of several years is indicated, the earliest accepted date is placed in columns 52-55 of the key-punch card and hyphen is entered in column 56. A firm date is entered in columns 52-55 without the following hyphen. B.C. dates in indicated by a <u>preceding</u> B in column 51. Prehistoric dates that exceed four digits are entered as subsequent scholarship often makes changes in the estimated dates.

Example of a computer-printed index

in call number order.

This is only one of many possible orders.

In Field 14 is entered the location of an historical event or of a fixed work of art; the present location of a movable work of art is used. City name is preferred (if known) otherwise the next larger political or geographical subdivision is used. Location names are spelled out in full on both the slide label and the key-punch card; they are not Cuttered or otherwise coded. It is possible to sort these names mechanically although the process will be somewhat slower than sorting coded data. In addition to city name, the abbreviated name of a collection may be entered following the city when it is appropriate to a movable work of art.

The 15th Field is used as a record of the source of the slide with the expectation that this information will be useful in reordering or replacing a lost slide. A slide can generally be traced to one of three sources -- a commercial firm's catalog, a local camerman who either took an original picture or copied an illustration from a book, or another slide from which a duplicate was made. Simple codes have been devised for the sources of the Santa Cruz collection; each library using the system can easily construct a system to meet its own needs.

The single-card format was purposely developed to keep the input effort to a minimum. By utilizing follower cards or perhaps other input techniques much fuller output information could be achieved. The example as it is presented here is somewhat analogous to "brief listing" in library cataloging -- it provides a good deal of basic cataloging data with a minimum of effort.

For many slides much more data -- important and even vital data -- could be encoded. For instance, group portraits may include dozens of identifiable people but the system as outlined allows for no more than two of them to be identified. A painting of an historical event is dated according to the date of the work of art, but the historian will also be interested in the date of the event pictured. Especially to encourage inter-disciplinary use of the slide collection, more added entries are called for.

Continuing development of the system might include on-line search and visual display, permuted indexes of multiple-word titles, and expanded printed indexes to include added title and subject descriptors. One of the basic goals of this project was to create a classification scheme that lent itself to both the traditional manual approach to slide retrieval and to the introduction of automated methods. A start has been made, but it is obvious that computer application can be carried much further.

HISTORY -- COUNTRY AND GEOGRAPHICAL SUBDIVISIONS

Period
Subdivide by Country

The geographical schedule is constructed to arrange country names alphabetically within each continent. Continents are arranged as follows:

018 AFRICA
150 ASIA: NEAR EAST
200 ASIA PROPER. FAR EAST
350 EUROPE
554 NORTH AMERICA
800 CENTRAL AMERICA
840 SOUTH AMERICA
865 THE OCEANS

Country names, or their equivalents, are given precedence; these stand in a column to the left and are intended as the primary choices in classifying HISTORY and ART slides. Terms indented to the right are terms denoting political divisions either smaller or larger than countries, or describing physical features unrelated to political boundaries. Many of these secondary terms will be needed to give adequate description to maps. In some instances a larger term, such as Africa, must be assigned to an art object when its point of origin cannot be more closely identified. In other instances it may be desirable to make use of smaller subdivisions. United States history might well be subdivided by state, however the art of the United States is better treated as a whole. A block of 95 numbers (650-745) is left at the beginning of the states list to allow each U.S. library the option of creating a special schedule for material of local or institutional interest.

In general, current country names are used, thus bringing under one number the whole scope of the ART and HISTORY of a geographical area even though its name may have changed many times through history. Flanders is noted in the list as an exception. The Flemish tradition in art history is so strong that to call Flemish art Belgian would be completely unacceptable. (See Flanders, 394) A special number is likewise provided for the Etruscan and Roman Empires (472) just ahead of Italy (474).

- .S Draft and pack animals (raising, training, care)
  Class animals at work with the appropriate industry.
- .T Saddle horses and other riding animals (raising, training, care)
  Include pleasure riding but not racing or other equestrian sport or business. See e.g., Horse Racing (L.P)
- .U Domestic pets
- .V Meat raising (including poultry)
- .W-Y *May be assigned to specific animals of local interest.*
- .Z Hunting and trapping

C FAUNA, INDIGENOUS ANIMALS, ANIMAL ECOLOGY
Cutter to the common name of the animal in Field 5, following. Prefer the Zoology division of SCIENCE unless the intent is to identify fauna as a part of the ecological background to History.

D FISH, FISHING INDUSTRY, SPORT FISHING
- .B Beach fishing, digging for shellfish
- .F Fish hatcheries
- .L Lake and stream fishing
- .O Ocean fishing
- .P Pier fishing
- .W Whaling

HISTORY:SUBJECT
Class Notation

Sort Field 3-4

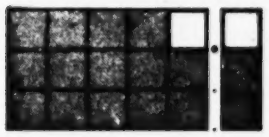
HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

E FORESTRY, LUMBERING
- .B Stumpage, standing timber
- .D Felling trees
- .F Transporting logs by land
- .H Transporting logs by water
- .J Sawmills, crews
- .L Lumber drying, seasoning
- .N Lumber camps, camp life
- .P Burn offs
- .R Reforestation, tree farming

F MINERAL RESOURCES, MINING
- .A Metal ores
- .B-K *May be assigned to specific metals of local interest.*
- .L Stone, non-metallic minerals
- .M-V *May be assigned to specific minerals of local interest.*
- .W Oil
- .X Water wells, springs, mineral baths
  Class domestic wells in J.X
- .Y Dams, flood control, hydroelectric power plants

G CITYSCAPE (MAN-MADE LANDSCAPE TOO DIVERSIFIED TO CLASSIFY ELSEWHERE)
- .A Aerial, panoramic views of a major portion of a city
- .B Business/industrial districts, general street scenes where no action, building or object dominates the picture
- .P Parks
- .R Residential areas, general street scenes where no action, building or object dominates the picture
- .W Waterfront development not otherwise classifiable as fishing industry, recreational or transportation facilities

H CULTURAL ACTIVITIES
- .A Archeological expeditions (where the intent of the search is cultural or historical)
  See A.A for geographical exploratory expeditions.
- .B Art, exhibits, galleries
- .D Dance, ballet (in a theatrical setting)
  Class social dancing in Recreation (L.V)
- .F Festivals and celebrations of a cultural nature (arts festivals, etc.) *See also other kinds of celebrations: Ethnic (K.H), Patriotic (H.H), Religious (Z), etc.*
- .H Holidays and celebrations of a patriotic nature
- .J Music, musicians, concerts
- .K Theater, drama, opera
  Class motion pictures in Recreation (L.J)
- .M Genealogies
- .N Historical monuments and markers
- .P History museums, historians
- .R Libraries, literature, authors
- .T Natural history museums
- .V Science museums
- .Z Zoos, aquaria



HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

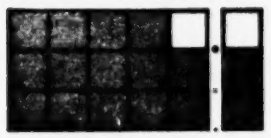
J DOMESTIC LIFE
- .A General scenes of life "at home" not otherwise classifiable in this list
- .C Courtship, marriage, weddings
- .D Births, infant care
- .F Cooking, foods, food preparation
- .G Dining
- .H Housekeeping, laundering
- .J Clothing, sewing, mending
- .K Servants
- .M Children's games, toys
- .N Adult parlor games, recreations
- .P Holiday or religious observance in the home
- .R Housing
- .S Home repair and maintenance
- .T Outbuildings, sheds, garages (except as in J.X, below)
- .X Privately maintained utilities (power, water, sanitation)

K ETHNIC, ABORIGINAL GROUPS, PRIMITIVE CULTURES

Class here those subcultures that retain their identities as separate and distinct from a more dominant host culture. Use of this class implies an ethnic mode of life distinctly different from the one surrounding it, e.g. American Indians or Australian Aborigineees. Ghetto cultures should ordinarily be considered social conditions of the host culture (See M.M) Primitive arts and artifacts may be classed here rather than in ART, when to class them with the ART of the locale would create untenable mixtures of primitive and civilized art, e.g. American Indian artifacts mixed with 19th century industrial design.

- .B Agricultural methods
- .D Fishing and hunting
- .G Communities, settlements
- .H Dance, music, ethnic celebrations
- .J Domestic life
- .L Recreation
- .M Social conditions and problems
- .O Business, barter, trade
- .P Communication methods

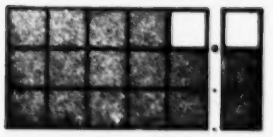
  E.g. Indian smoke signals. In contrast, communication methods in the Negro Ghetto are not essentially different from that in the surrounding community. Apply this kind of test to all subdivisions in the Ethnic class (K).
- .Q Crafts, folk arts, primitive arts
- .T Transportation
- .U Education
- .V Government and political systems
- .X Medicine, death
- .Y Military activities, armed resistance
- .Z Religion



HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

L RECREATION OUTSIDE THE HOME, SPORTS
- .A Amusement parks, casinos
- .B Beauty pageants
- .C Circuses, carnivals, rodeos
- .E County, state fairs, local exhibitions
- .F International expositions, world fairs
- .J Motion pictures
- .K Parades
  Use only if unclassifiable elsewhere. Prefer Beauty Pageants (L.B), Circuses (L.C), Military (Y.N), Funeral (X.V), etc.
- .L Water carnivals, aquacades
- .N Animal fights (two animals or man and animal)
- .P Racing (horse, dog, auto)
- .Q Sports (individual land sports such as golf, tennis, skating)
- .R Team sports (baseball, football, polo, etc.)
- .S Water sports (swimming, boating, beach bathing, etc.)
- .U Camping, hiking, mountain climbing
- .V Dancing, social and folk
  Class theatrical dance in Cultural Activities (H.D)
- .W Picnics, barbeques
- .Z Vacation resorts, tourism

M SOCIAL CONDITIONS AND PROBLEMS
- .B Economics, inflation, depression
- .C Taxation
- .D Unemployment
- .E Retirement
- .G Poverty
- .H Charities, welfare agencies other than medical *(See X.E)*
- .J Labor organizations, strikes, picketing
  Include their parades
- .K Fraternal orders
  Include their parades
- .M Minority groups (aspects which impinge upon the social conditions of the majority and are considered problems)
  Use subject division K where ethnic groups are distinctly separate from the dominant culture.
- .P Slavery
- .Q Migrations
- .T Divorce
- .U Drinking, alcoholism, drug addiction
- .V Gambling (not including horse and dog racing)
- .W Illegitimacy
- .X Adoptions
- .Z Prostitution



HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

N DISASTERS, NATURAL AND ACCIDENTAL
Class all vehicular accidents in Transportation (T).
.B Drought, dust storms
.D Floods
.F Lightning damage
.H Snow, sleet, hail
Use only if damage is significant, otherwise these are normal aspects of Climate (A.C).
.J Wind storms (other than dust storms)
.L Earthquakes
.N Tidal waves
.P Volcanic eruptions
.R Landslides
If related to Floods, Earthquakes or Volcanic eruptions, prefer those subdivisions.
.X Explosions
.Y Fires

O BUSINESS AND COMMERCE
.A Auto service, gas stations, repairs, sales
.B Banking, insurance, stock broking and related financial services
.D Barber, shoe shine and related personal services
.E Chambers of Commerce and other business associations
.F Civil engineering, surveying
.H Hotels, motels, apartments and other living accommodations
.J Junk, garbage collection, wrecking and disposal businesses
.L Laundry, cleaning, related maintenance services
.M Real estate
.N Repair services (except auto)
.P Building supply houses
.Q Department, dry goods, furniture, hardware and all other non-food related retail businesses
.R Groceries, drugs, butchers, and other food-related retail businesses
.S Nurseries and other agriculture-related businesses
.T Restaurants, saloons and other food-serving businesses
.V General office buildings (single buildings incorporating more than one type of business)
.W Shopping centers, marketplaces (complexes incorporating more than one type of business)
.X Street vendors, itinerant peddlers
.Z Warehousing, draying

HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

P COMMUNICATIONS, PUBLIC UTILITIES
Use this class for the public, industrial or commercial aspect of the subject. The private consumer aspect class in Domestic Life (J) or other appropriate class. Privately maintained utilities class in J.X.

- .B Postal service
- .E Printing and publishing other than newspapers
  Include sales and distribution
- .F Newspapers
  Include publishing, sales and distribution
- .H Radio broadcasting and production
- .L Television broadcasting and production
- .N Telephone and telegraph
- .P Utilities (collectively)
- .Q Electricity
  Use F.Y for hydroelectric power plants
- .R Gas
- .S Sewage
- .W Water

Q CRAFTS, TRADES (HAND PRODUCTION)
Use Manufacturing (R) for production that is essentially mechanized. Class Repair Services in Business (O).

- .B Blacksmithing, metalsmithing
- .C Cabinetmaking, furnituremaking
- .E Carpentry, architectural construction
- .F Carriagemaking
- .H Carving and other work in wood
- .J Clock and watch making
- .K Glassblowing and other work in glass
- .L Leather work, shoemaking
- .M Masonry
- .N Carving and other work in stone
- .P Pottery making
- .S Sewing, dressmaking
- .W Weaving

HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

R MANUFACTURING (PRODUCTION AND PROCESSING BY MECHANICAL MEANS)

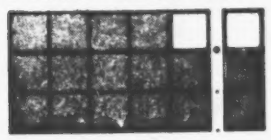
Use Crafts (Q) for custom production and hand crafting of similar products.

- .A Aircraft manufacture and assembly
- .B Automobile manufacture and assembly
- .C Shipbuilding
- .D Vehicle manufacture and assembly other than the above
- .F Food processing and packaging
- .H Building materials manufacture
  Except lumbering and saumills, see E.J.
- .J Electrical and electronic products
- .K Glass products
- .L Leather products
- .M Metal products and machinery not otherwise classified in this list
- .P Paper and paper products
- .Q Plastic and plastic products
- .S Pottery and ceramic products
- .T Powder, munitions, explosives
- .V Weapons, arms and armor
- .W Wood products not otherwise classified in this list
- .Y Textiles, clothing manufacture

S SCIENTIFIC RESEARCH

Use only when it is desirable to identify scientific research with a particular place in its historical setting. Prefer the major SCIENCE classes R-X for research. Class the products of scientific research elsewhere in HISTORY.

- .R Mathematics
- .S Astronomy and Space Sciences
- .T Earth Sciences
- .U Physical Sciences
- .V Life Sciences
- .W Medical Sciences
- .X Technological research and Engineering



HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

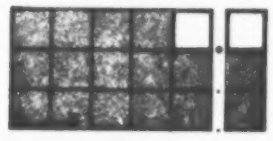
T TRANSPORTATION

Includes public and private means of transporting passengers and freight, but does not include riding horses (see B.T), any type of sport or racing (see L.P), or manufacture of vehicles (see R). Does include the building of roads, bridges and other facilities listed below. Does not include Military or Naval craft.

- .A Air transportation, routes, landing fields
- .B Lighter-than-air craft
- .C Heavier-than-air craft
- .D Crashes, accidents
- .E Terminal, maintenance and support facilities
- .F Traffic control facilities and devices
- .G Land transportation, roads, bridges, tunnels
- .H Man-powered vehicles
- .I Animal-powered vehicles
- .J Machine-powered vehicles
- .K Accidents
- .L Bus or truck terminal, maintenance and support facilities
  Class private garages as Domestic outbuildings (J.T).
  Class retail gas and service stations as Business (O.A).
- .M Traffic control facilities and devices
- .N Rail transportation, routes, bridges, tunnels
- .O Animal-powered vehicles
- .P Machine-powered vehicles
- .Q Accidents
- .R Terminal, maintenance and support facilities
- .S Traffic control facilities and devices
- .T Water transportation, routes, canals, locks
- .U Man-powered craft
- .V Wind-powered craft
- .W Machine-powered craft
- .X Accidents
- .Y Terminal, docking, maintenance and support facilities
- .Z Traffic control facilities and devices
  Include bouys, lighthouses, etc.

U EDUCATION

- .C Chautauquas, educational lectures
- .E Elementary schools
- .H High (secondary) schools
- .J Junior colleges
- .T Trade, business, vocational schools
- .U Universities, colleges
- .Z Illiteracy



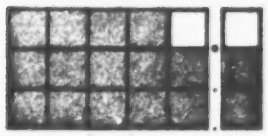
HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

V GOVERNMENT AND POLITICS
- .B Political parties, rallies, conventions parades (but not campaigns)
- .D Election campaigns
- .E Elections, voting
- .F Women's suffrage
- .H Executive branch of government, officials
  Include unknown branch or more than one branch
- .J Judicial branch of government, officials
- .L Legislative branch of government, officials
- .N Civil service, government employees
  Class police in Law Enforcement (W), fire departments with Fires (N.Y), public utilities in P.
- .V Visiting dignitaries
- .X Foreign embassies

W LAW ENFORCEMENT AND CRIME
- .B Police work, detection
- .D Arrest, capture, pursuit
- .F Homicide, scene of the crime, victims
- .G Suicide
- .H Other than homicide, scene of the crime, victims
- .J Jails, prisons
- .K Executions
- .L Lawyers, private law practice
- .P Public prosecutors, public defenders
- .T Trials, juries
  Note: judges are classed in V.J unless trial action is pictured.

X MEDICAL SERVICES, DEATH
- .B Diseases
- .C Injuries (except in connection with military action)
- .E Medical care, doctors, clinics
- .F Quack physicians and remedies
- .G Medicines, drugs
- .H Home remedies, folk medicine
- .J Dental care, dentists, clinics
- .N Hospitals
- .R Rest homes for the aged
- .S Sanitoriums, asylums
- .V Funerals, wakes, processions
- .X Undertaking
- .Y Cemeteries

HISTORY:SUBJECT
Class Notation



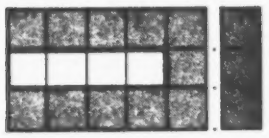
Sort Fields 3-4

HISTORY -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

Y MILITARY AND NAVAL AFFAIRS
- .A Air force, military air craft
- .B Air battles
- .C Camp life, air bases
- .D Casualties
- .E Parades, ceremonies, bands
- .F Recruiting, training on the ground
- .J Army, army vehicles
  Include here unidentified branch of the service or more than one branch.
- .K Battle, occupation duty
- .L Camp life, encampments, fortresses, bases
- .M Casualties
- .N Parades, ceremonies, bands
- .O Recruiting, training, maneuvers
- .S Navy, naval craft
- .T Naval battles
- .U Camp or shipboard life, naval bases
- .V Casualties
- .W Parades, ceremonies, bands
- .X Recruiting, training

Z RELIGION
- .C Churches, services, ceremonies
  Class here services of unknown faith or ecumenical.
- .D Catholic services, etc.
- .E Jewish services, etc.
- .F Protestant servcies, etc.
- .G-L Other faiths
- .M Missions, Catholic
- .N Missions, other faiths
- .R Religious camps and campgrounds
- .S Rescue missions
- .T Street or tent meetings

HISTORY:KEY WORD
Class Notation



Sort Field 5

HISTORY -- PRIMARY KEY WORD

Period
  Country
    Subject
      Subdivision of Subject
        Subdivide by Primary Key Word

Use the Cutter-Sanborn Three-place Table to Cutter the key word best describing the subject content of the picture. Prefer personal names, proper names of events, organizations, buildings, businesses, etc. Ask questions in this order to determine a suitable term -- who? what? where? Attempt to name the most prominent object in the picture; this will tend to keep those objects or persons together in the file. As a last resort Cutter the subject term selected for Field 4.

See also Field 8. These two Fields provide the opportunity to insert two key words into the classification notation. The second key word selected may be less specific than the first, modifying the first, perhaps identifying a second person or thing of nearly equal importance, or some landmark in the background which may occur elsewhere in the file as a primary element. It is important to note that terms entered in Field 8 will have little effect upon the filing order. The term entered in Field 5 is much more significant in placing like things together in the file.

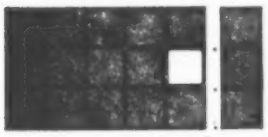
Example: Within the classification of twentieth century U.S. Government and Politics, Nixon's Inauguration would be Cuttered in this way:

Field 5: N736 (Nixon)
Field 8: I350 (Inauguration)

By this means all pictures of Nixon's presidency would be kept together. If "Inauguration" were placed first, then all inaugurations would come together in the file but pictures of each president would be scattered.

City name need not be considered for inclusion as an entry in either of the Key Word Fields if the suggested key-punch format is utilized. The key-punch format provides a Field for city name outside the call number notation.

HISTORY:FORMAT
Class Notation



Sort Field 6

HISTORY -- FORMAT

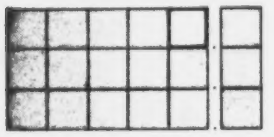
ART -- MEDIUM (ART FORM)

ART: MEDIUM
Class Notation



Sort Field 3

Period
  Country
    Subdivide by Medium

A Architecture: anonymous
B Architecture: known artist
Media are treated in dual fashion throughout this list with anonymous works preceding those by known artists. The anonymous notation is followed in Field 5 by a Cutter number for place of origin (usually city) or by a contrived Cutter number representing a Stylistic subdivision. The notation for known artist is followed in Field 5 by a Cutter number for the surname of the artist or, in some cases, for a corporate name representing a group of people in lieu of an individual artist such as tribe or school.

C Sculpture: anonymous
D Sculpture: known artist

E Painting: anonymous
F Painting: known artist

G Drawing: anonymous
H Drawing: known artist
Drawing is defined as monochromatic rendering as opposed to polychromatic. Preliminary sketches for works in other media are classed with the media of the finished product.

J Book arts: anonymous
K Book arts: known artist
Includes alphabets, calligraphy, bookbinding, inscriptions, manuscripts, papermaking, printing and illustration. (See list of techniques on page 103)

L Graphic arts: anonymous
M Graphic arts: known artist
Distinguished from drawing in that the artist prepares a master from which many prints can be made. (See list of techniques on page 103)

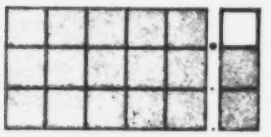
(See page 109)

ART -- STYLE

ART: STYLE
Class Notation



Sort Field 4

Period
  Country
    Medium
      Subdivide by Style

Use of this field is optional, but will be of use especially in the earlier chronological periods -- Pre-historic through Medieval -- in which the vast majority of art works extant are by unknown artists. Style is a property of art not easily defined, nor always agreed upon, but in certain areas of art history Stylistic terms take on great importance. In some parts of the world in poorly documented eras of history, Stylistic terms may be the only identifying labels that can be assigned to a work of art.

The Medieval period of Europe is an excellent example of this highly anonymous situation. Very few artists are known. The Styles of the middle ages cross national boundaries indiscriminately and overlap one another chronologically. Field 4 affords the means of relating all Byzantine works, for instance, regardless of how scattered they may be placed in the file due to their diverse geographic origins.

In periods later than the Medieval, Stylistic classification may also prove useful for the art of some countries. However, its use is not recommended in the later periods for the countries in the Western tradition. In these the majority of the art works will be identified by personal artist and use of the Style field would tend to fragment in the file the works of an individual who worked in more than one style. It is more important to keep the works of an individual together.

Prefer HISTORY -- Ethnic, aboriginal groups, primitive cultures (See page 42) for Primitive Arts, especially in the later chronological periods where, e.g. American Indian artifacts would become mixed with industrial design if included in ART of the United States.

Special Stylistic schedules are created for countries represented by a significant body of anonymous art. Terms are generally placed in a chronological order. Examples follow:

BURMA
- .C Prome, Thaton and Pegu (1st-8th centuries A.D.)
- .D Pagan (8th century-1287)
- .E Shan-Thai empire (1287-1760)

ART -- ORIGIN (ARTIST, PLACE OR SUBDIVISION OF STYLE)

Period
  Country
    Medium
      Style
        Subdivide by Origin

Field 5 in the call number is used to identify the origin of a work of art. In order of priority these origins are preferred:

1. *Personal or corporate name of artist. Enter Cutter number in Field 5. Treat "School of" like a known artist, Cuttering to the name of the master of the school. Treat tribal names of primitive cultures like known artists.* *See Appendix II, p.149.*

2. *City, archeological site, or other political subdivision. Enter Cutter number in Field 5. If city is unknown, use next larger appropriate unit -- county, province, region, etc.*

3. *Subdivision of Style. Enter a contrived Cutter number in Field 5 from the special schedules below.*

4. *If not enough information is available to place a work in any of the above categories, or if no special schedule exists, then enter A000 as a Cutter number signifying "insufficient information".*

ART -- SUBJECT DIVISIONS SUMMARY

Period
  Country
    Medium
      Style
        Origin
          Subdivide by Subject (Summary)

There are separate Subject Schedules for each of the various Art Media. Those media that are truly pictorial in nature are divided by the subject content of the picture. Those media that are not pictorial, e.g. Architecture, Book Arts, Fabrics, etc., are divided by some other function, such as technique. Divide:

Architecture by BUILDING TYPE
  A-Z *See page 90.*

Sculpture by SUBJECT
  A-Z *See page 97.*

Painting by SUBJECT
  A-Y *See page 101.*

Drawing by SUBJECT
  A-Y *See page 101.*

Book arts by TECHNIQUE
  A-Z *See page 102.*

Graphic arts by SUBJECT
  A-Y *See page 103.*

Photography by SUBJECT
  A-Y *See page 104.*

Ceramic and glassware by SHAPE
  A-Z *See page 105. For Greek shapes see page 106.*

Mosaics, stained glass by SUBJECT
  A-Y *See page 106.*

Fashion and fabric design by PRODUCT
  A-Z *See page 107.*

Minor arts in other materials by PRODUCT
  A-Z *See page 108.*

Art theory, commercial art and theater arts by TECHNIQUE
  A-Z *See page 109.*

ART -- SUBJECT DIVISIONS AND SUBDIVISIONS

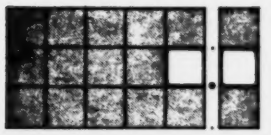
Period
  Country
    Medium
      Style
        Origin
          Subdivide by Subject

ARCHITECTURE BY BUILDING TYPE *(See page 114 for a method of identifying parts of buildings)*

A AGRICULTURE
- .B Barns, animal shelters
- .D Dairies
- .M Machine sheds
- .R Slaughter houses
- .S Storage bins, silos, granaries
- .W Water and irrigation structures, windmills

B CITY PLANNING
- .A Arcades, malls
- .C City planning
- .D Grid plan
- .E Radial plan
- .G Greenbelt plan
- .M Megalopolis
- .N Metropolis
- .S Sprawl architecture
- .T Subdivisions
- .U Urban renewal, redevelopment

C COMMERCIAL AND BUSINESS
- .A Auto service, gas stations, repairs, sales
- .B Banking, insurance, stock broking, related financial services
- .D Barber shop, shoe shine, related personal services
- .E Building supply houses and yards
- .F Department, dry goods, hardware, related non-food retail businesses
- .G Groceries, drugs, food-related businesses
- .J Junk yards
- .L Laundries, cleaning, repair businesses *(except auto)*
- .N Nurseries, greenhouses
- .O Office buildings incorporating diverse businesses
- .P Outdoor marketplaces
- .Q Real estate offices
- .R Restaurants, saloons, food-serving businesses
- .S Shopping centers incorporating diverse businesses
- .W Warehouses



ART -- SUBJECT DIVISIONS AND SUBDIVISIONS

ARCHITECTURE BY BUILDING TYPE *(continued)*

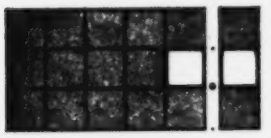
D COMMUNICATIONS
- .N Newspaper publishing and distributing
- .P Post Office
- .R Printing and publishing other than newspapers
- .S Radio and television
- .T Telephone and telegraph

E EDUCATION

If individual buildings or interiors are shown, classify by Building Type as follows:
- .A Administration
- .C Classroom
- .E Gallery or museum
- .G Library
- .I Science laboratory
- .K Vocational laboratory

If more than one type of building is prominent in the picture, classify by type of institution:
- .N Elementary school
- .P High, secondary school
- .R Trade, business, vocational school
- .T University, college
- .X School for the handicapped

F ENGINEERING
- .A Bridges (miscellaneous types)
- .B Arch
- .C Cantilever
- .D Suspension
- .E Truss
- .G Garbage, refuse, waste, sewage plants
- .L Levees
- .N Reservoirs, dams
- .P Power plants (miscellaneous types)
- .Q Atomic power
- .R Hydro-electric
- .S Steam
- .T Towers, smoke stacks, light standards
- .U Tunnels
- .W Water distribution and treatment structures



ART -- SUBJECT DIVISIONS AND SUBDIVISIONS

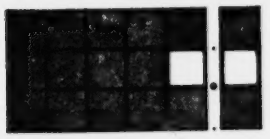
ARCHITECTURE BY BUILDING TYPE *(continued)*

G FANTASTIC, FUTURISTIC ARCHITECTURE
- .E Fantastic buildings
- .G Futuristic designs

H FUNERARY
- .B Beehive tombs
- .C Cemeteries
- .E Crematoria, columbaria
- .F Funeral chapels
- .K Mastabas
- .N Necropolis
- .P Pyramid tombs
- .R Rock-cut tombs
- .T Tombs (other types)
- .V Tumuli

I GOVERNMENTAL
- .B Capitol buildings, seats of government
- .C Civic centers, governmental complexes
- .F Fire departments
- .J Judicial buildings, courts
- .L Legislative buildings if apart from capitol buildings
- .M Municipal auditorium
- .O Office buildings, headquarters of governmental departments
- .P Police buildings
- .R Prisons, jails, penitentiaries
- .V Veterans' buildings

J HEALTH
- .D Doctor's, dentist's office buildings
- .F First aid stations
- .H Hospitals
- .K Medical and dental centers, clinics
- .M Mental hospitals
- .P Pharmacy buildings in medical centers
  Class retail drug stores in Commercial (C.G)
- .S Sanitoriums, convalescent homes
- .V Veterinary buildings



ART -- SUBJECT DIVISIONS AND SUBDIVISIONS

ARCHITECTURE BY BUILDING TYPE *(continued)*

K HOUSING: SINGLE-FAMILY DWELLING
- .A Animal houses (domestic)
  - *Class farm buildings in Agriculture (A.B)*
  - *Class zoo buildings in Museums (Q.Z)*
- .H Houses, one-story
- .J Houses, two-story
- .L Houses, multiple-story
- .O Outbuildings (domestic)
- .P Primitive houses (miscellaneous types)
- .R Adobe, mud
- .T Caves
- .V Stilt
- .X Tent, tepee
- .Z Thatch, straw

L HOUSING: SPECIAL, MULTIPLE-FAMILY DWELLING
- .A Apartments
- .B Apartment communities, blocks
- .D Beach and lake homes, seashore homes
- .E Castles
- .G Chalets
- .H Chateaux
- .J Condominiums
- .K Country homes
- .M Gazebos
- .N Hotels, inns, guest housing
- .P Mansions
- .Q Motels
- .S Mountain cabins
- .T Palaces
- .V Rowhouses
- .W Skyscraper housing
- .Y Terraced apartments
- .Z Villas

M INDUSTRIAL
- .B Chemical plants
- .F Factories, assembly plants
- .I Industrial parks, blocks
- .M Mills (steel, textile, lumber, etc.)
- .P Mining buildings and structures
- .S Research and development buildings
- .U Shipyards

ART: SUBJECT
Class Notation

Sort Field 6-7

ARCHITECTURE BY BUILDING TYPE *(continued)*

N LANDSCAPE ARCHITECTURE
- .D Desert, arid land landscaping
- .E Erosion planting, terracing
- .G Gardens, formal
- .I Gardens, informal
- .K Indoor planting
- .N Parks
- .P Playgrounds

O MILITARY INSTALLATIONS, FORTIFICATIONS
- .A Administration buildings
- .C Armories
- .E Arsenals, ammunition dumps
- .G Bomb, fallout shelters
- .H City walls, gates
- .J Forts and fortifications
- .M Moats
- .S Space facilities, launch sites, tracking stations

  If one of the individual building types above cannot be used, class by one of the following:
- .X Military (Army or unknown branch of service) Base
- .Y Army or Navy Air Base
- .Z Naval Base, naval shipyard, docks

P MONUMENTS
- .A Arches
- .C Columns
- .F Fountains
- .M Monoliths
- .S Stairs, steps

Q MUSEUMS, GALLERIES, ETC.
- .A Art galleries
- .C Art museums
- .H Historical museums
- .I Industrial museums
- .N Natural history museums
- .S Science museums
- .W Wax museums
- .Z Zoos

ART -- SUBJECT DIVISIONS AND SUBDIVISIONS

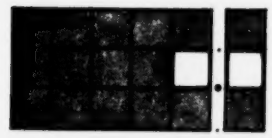
ARCHITECTURE BY BUILDING TYPE *(continued)*

R RECREATIONAL
- .A Amphitheaters
- .B Amusement parks
- .C Concert, opera halls
- .D Dance halls
- .E Exposition buildings
- .F Fair grounds
- .G Golf clubs, country clubs
- .J Gymnasiums, indoor sports arenas
- .K Hunting lodges
- .P Park buildings, shelters, bandstands
- .R Race tracks
- .S Stadiums, colosseums
- .U Swimming pools, indoor and outdoor baths
- .W Theaters
- .Y Yacht clubs, pleasure boating facilities

S RELIGIOUS
- .A Abbeys
- .B Baptistries
- .C Basilicas
- .E Cathedrals
- .F Chapels
- .G Churches
- .I Convents
- .J Meeting houses
- .L Missions
- .M Monasteries
- .O Mosques
- .Q Nunneries
- .S Priories
- .U Shrines
- .V Synagogues
- .X Temples
- .Y Tholoi

T SOCIAL INSTITUTIONS
- .D Day nurseries
- .H Homes for the aged, rest homes
- .O Orphanages
- .R Rescue missions

ART: SUBJECT
Class Notation

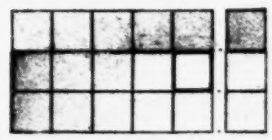


Sort Field 6-7

ARCHITECTURE BY BUILDING TYPE *(continued)*

U TRANSPORTATION
- .A Airports, runways or overall views
  Class Military Air Bases in O.Y
- .B Air passenger terminals
- .C Control towers
- .D Hangars and shop buildings
- .F Bus passenger stations
- .G Car barns (bus or streetcar)
- .J Elevated train stations and structures
- .L Harbor facilities, piers
  Class Yacht clubs in Recreational (R.Y)
- .N Highways, freeways, interchanges, toll plazas
- .P Railroad passenger terminals
- .Q Railroad switch towers
- .R Roundhouses and shops
- .S Subway stations, entrances
- .T Truck terminals
- .W Waterway constructions, canals, locks

ART: SUBJECT
Class Notation



Sort Field 6

SCULPTURE BY SUBJECT

In using this Schedule to assign Subject codes, prefer those terms that describe pictorial content if the work possesses any pictorial or illustrative qualities. Only if there is no subject content, use those terms that are descriptive of form or format, such as Abstractions (A), Altarpieces (B), Furniture, Ornamented (L), Modern Movements (O), and Tombs (Z).

A ABSTRACTIONS (Art which has no reference to known visible objects, art which is intended to be separate from natural appearances)

Accept at face value the title given a work by the artist, e.g., if an abstraction is titled "Landscape" class it as Landscape (P). Movements such as Cubism, Constructivism, Orphism, Futurism, Dadaism, Surrealism, Abstract Expressionism, and Non-objective Art are classed here only if unclassifiable elsewhere by content or title. The new movements of the 1960's are classed as Modern Art Movements (O).

B ALTARPIECES (Decorative screens above and behind altars)

Use this class when the decorative material on the altarpiece is too diverse to classify as any single subject.

C ANIMALS AND PLANTS

Do not include mythological beasts (see R). Include horse and rider when rider is unknown and when the work is not considered an equestrian monument (see Q). Include hunt scenes and race track scenes. If animals and plants are a part of a Landscape or Still Life, prefer those classes.

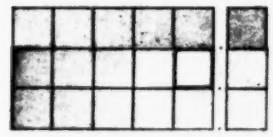
D ASIAN RELIGIOUS SUBJECTS

Include all Eastern non-Judeo-Christian religions. In Oriental arts this class takes precedence over other subjects.

F CYCLES OR SERIES (Several works of an artist that are grouped together and traditionally known by a collective name)

Use this class when the total work needs to be kept together and its individual pieces are of diverse subject content that would otherwise cause the parts to be scattered in the file, e.g. pages from an artist's notebook.

ART: SUBJECT
Class Notation



Sort Field 6

SCULPTURE BY SUBJECT *(continued)*

G ARCHITECTURAL ILLUSTRATION (Views of interiors or exteriors of buildings where figures are not prominent)
Include representations of furniture or parts of buildings such as staircases, etc.

H BUSTS (Head and shoulders of human figure of either sex whose name is unknown)
If name is known class as Portrait (W). If more than the head and shoulders are represented class as Figure.

I FIGURE GROUPS (Two or more figures unknown by name)
If a slide shows several individual figure studies the slide should be treated as a single figure. Class as a Group only if the group of figures appears to have been conceived as a unit by the artist. Prefer other classes if the title is descriptive enough to suggest subject content, or if the figures are a very small part of a landscape, for instance.

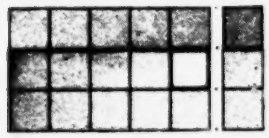
J FIGURE, MALE (Any single male figure of any age, or figure of indistinguishable sex, and unknown by name)
If name is known class as Portrait (W). Also prefer classes such as Historical (N), Mythological (R), and Religious subjects (D,S,T,U,V,X). Include here any part of the human figure other than Bust.

K FIGURE, FEMALE (Any single female figure of any age, when name is unknown)
All other rules of J, above, apply.

L FURNITURE, ORNAMENTED (Any interior furnishing on which the sculptured or painted decoration transcends the significance of the piece as furniture)
Include attached furniture such as altars, pulpits, pews, fonts, etc. Determining factor for inclusion in this class is the clear dominance of the applied ornamentation over the basic functional design. Most furniture, not so ornamented, is classed with MINOR ARTS IN OTHER MATERIALS (see page 54).

M GENRE (The depiction of everyday activity -- candid, unposed groupings of people in their natural environments doing everyday tasks or participating in common recreations)

ART: SUBJECT
Class Notation



Sort Field 6

SCULPTURE BY SUBJECT *(continued)*

N HISTORICAL, MILITARY, POLITICAL
Include battles, historical and dated events, governmental episodes. Use in preference to less specific classes such as figures, landscape, etc. Also include here representations of historical figures that are obviously not portraits, i.e. portraits not done from life but from the imagination.

O MODERN (CONTEMPORARY) ART MOVEMENTS
Include Op Art, Pop Art, Funk Art, Junk Art, and generally any works of the 1960's that cannot be better classified elsewhere. Prefer any other subject class to this one.

P LANDSCAPES, SEASCAPES, CITYSCAPES (exterior views where figures do not predominate)
Prefer classes with more specific subject content such as Genre (M), Historical (N), Mythological (R), and Religious (D,S,T,U,V).

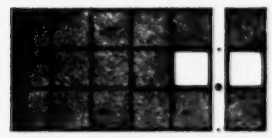
Q MONUMENTS (freestanding monolithic works that honor and commemorate)
Include columns, fountains, obelisks, equestrian statues (if rider is unknown). Class funerary monuments in Tombs (Z).

R MYTHOLOGICAL, ALLEGORICAL, LEGENDARY, LITERARY, EPIC
Include illustrative material of all forms of literature not otherwise classified as Historical or Religious.

S NEW TESTAMENT (events, parables, etc. of the New Testament)
Do not include here representations of Christ, the Virgin Mary, or named Saints. (see below)

T NEW TESTAMENT: CHRIST (events in the life of Jesus from the New Testament scriptures)

U NEW TESTAMENT: MARY (events in the life of Mary up to the birth of Jesus)
Include formalized Madonna and Child, but class nativity scenes with the Life of Christ.



SCULPTURE BY SUBJECT *(continued)*

V OLD TESTAMENT AND APOCRYPHA (events and characters from the Old Testament and the Old Testament Apocrypha)
Class named angels with Saints (X).

W PORTRAITS
Include portraits of known persons or groups of persons when it can be assumed that there is a literal likeness. Prefer over any of the figure categories. All self portraits are classed here regardless of the title assigned by the artist. Group portraits where the name of the group is known are classed here. However, if the artist has faithfully recorded an historical event complete with identifiable portraits of participants class this as Historical (N).

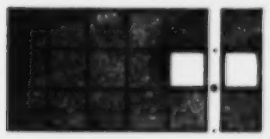
X SAINTS
Includes named saints and angels from the scriptural record. Also martyrs, hermits, anonymous bishops and popes, and other characters and scenes from the Christian historical and literary tradition outside of canonized scripture.

Y STILL LIFE
Include representations of dead animals, parts of animals, plants, drapery, clothing, or any variety of inanimate objects, singly or in any arrangement that could conceivably be called a still life. A still life cannot contain human figures.

Z TOMBS (sarcophagi, cinerary urns, funerary monuments, steles)

Sculpture may be further subdivided as follows, if any of these conditions are applicable:

.B Cast (one of several copies of a work produced by the artist)
.C Copy after an original
.M Model, maquette
.P Replica
.R Restoration



ART -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

PAINTING BY SUBJECT
See Sculpture by Subject for full descriptions, page 97 .

A Abstractions
B Altarpieces
C Animals and plants
D Asiatic religious subjects
F Cycles or series
G Architectural interiors or exteriors
H Busts
I Figure groups
J Figure, male
K Figure, female
L Furniture, ornamented
M Genre
N Historical, military, political
O Modern (contemporary) art movements
P Landscapes, seascapes, cityscapes
R Mythological, allegorical, legendary, literary, etc.
S New Testament
T New Testament, Christ
U New Testament, Mary
V Old Testament and Apocrypha
W Portraits
X Saints
Y Still lifes

Painting may be further subdivided as follows, if any of these conditions are applicable:

.C Copy after an original
.R Restoration
.U Ultra-violet photograph
.V Variant
.X X-ray photograph

DRAWING BY SUBJECT
Divide like Painting by Subject

A-Y

ART -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

BOOK ARTS BY TECHNIQUE

A Alphabets, development of alphabets, manuscript styles, calligraphic design.
Prefer following classes for actual examples of work. Use this class only for diagramatic and design material.

B Bookbinding.
Use for illustration of binding technique. Use for pictures of actual bindings only if no examples of the interior of the book are present in the files. If such examples are present in the file, keep pictures of the covers of the book together with the pages.

C Carved inscription

E Clay tablet

G Manuscript in roll or other non-book format

H Manuscript in codex or book format

I Illuminated manuscript book

K Papermaking, watermarks

M Printers' marks

P Printing: block

Q Illustrated block book

S Printing: hand press with moveable type

T Illustrated hand press book

V Printing: machine press

W Illustrated machine press book

Y Type face alphabets, styles and design
Prefer above classes for actual examples of work. Use this class only for diagramatic and design material.

Further subdivide by subject matter as follows:

.A Art

.B Bestiary (treatise on beasts)

.C Bible (Old and/or New Testament or any parts thereof not listed separately below)

.D Gospels

.E Psalter (Book of Psalms)

.F Catalogs, bibliographies

.G Dictionaries, lexicons, encyclopedias, other general reference works

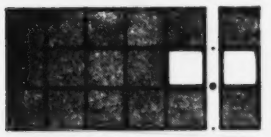
.H Emblem book, heraldry

.J Herbal (treatise on plants)

.K History and biography

.L Horary (book of hours)

.M Journals, diaries



ART -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

BOOK ARTS BY SUBJECT *(continued)*

.N Koran, other Moslem religious writings
.P Literature, fiction
.Q Music, hymnals
.R Non-fiction other than specific topics elsewhere in this list
.S Philosophy
.T Poetry
.U Religious (Christian) writings other than those listed
.V Sacred writings of other religions
.W Science and mathematics
.X Talmud, other Jewish religious writings
.Y Travel and exploration

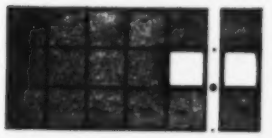
GRAPHIC ARTS BY SUBJECT

Divide like Painting by Subject. *See page 101.*

A-Y

Further subdivide by technique as follows:

.B Acid etching
.C Aquatint
.D Drypoint etching
.E Engraving, copper
.F Engraving, steel
.G Engraving, wood
.K Linoleum cut
.L Lithograph
.M Mezzotint
.N Monoprint
.P Photo-engraving
.R Relief print
.S Serigraph
.T Silk screen print
.U Stipple print
.W Woodcut
.Y Multi-media print
.Z Other media



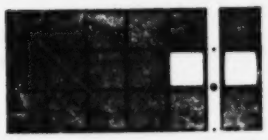
ART -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

PHOTOGRAPHY BY SUBJECT

A Abstractions
C Animals and plants
D Asiatic religious subjects
E Special photographic effects (multiple exposure, montage, stereograph, etc.)
Prefer to other terms in this list.
F Cycles or series
G Architectural interiors or exteriors
H Busts
I Figure groups
J Figure, male
K Figure, female
M Genre
P Landscapes, seascapes, cityscapes
W Portraits
X Christian religious subjects
Y Still lifes

Further subdivide by technique as follows:

.A Ambrotype
.B Albumen print
.C Calotype
.D Color print
.E Daguerreotype
.F Dry plate, gelatin
.H Heliograph
.J Orthochromatic print
.L Panchromatic print
.N Photogravure
.P Platinum print
.R Rayograph
.S Sepia
.T Tintype
.W Wet plate, collodion
.Z Other or unknown technique



ART -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

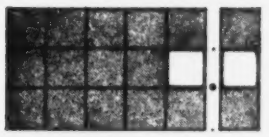
CERAMIC AND GLASSWARE BY SHAPE

See special schedule on next page for Greek Vases by Shape. Do not use this schedule for Greek vases.

A Basin (rimmed water container)
B Bottle
C Bowl (food container deeply rounded)
D Box
E Censer, incense burner
F Chalice
G Cooking dish, pot
H Covered container
I Cup, mug, drinking container of clay base
J Dish, other shapes
K Ewer, flask
L Figurine
M Jar
N Miniature
O Pillow stand, ink stand
P Pitcher, creamer
Q Planter, flower pot
R Plate
S Platter
T Stemware
U Tumbler, glass, drinking container of vitreous base
V Tea pot, tea kettle, coffee pot
W Vase, urn
Y Groups of objects and types
Z Other shapes

Further subdivide by subject matter if objects are decorated with pictorial elements. Use the schedule for Painting by Subject, page 101.

.A-Y



ART -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

SPECIAL SCHEDULE FOR GREEK VASES BY SHAPE

A Alabastron
B Amphora
C Aryballos
D Dinos
E Hydria
F Kantharos
G Kotyle
H Krater (bell, column, volute)
I Kylix
J Lebes, Lebes Gamikos
K Lecythos
L Loutrophoros
M Mastos
N Oinochoe
O Olpe
P Pelike
Q Phiale
R Pinax
S Plemochoe
T Psykter
U Psylster
V Pyxis
W Rhyton
X Skyphos
Y Stamnos
Z Other shapes

Further subdivide Greek vases by subject matter, using the schedule for Painting by Subject.

.A-Y

MOSAICS, STAINED GLASS BY SUBJECT

Divide like Painting by Subject. See page 101.

A-Y

ART: SUBJECT
Class Notation

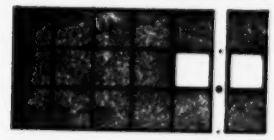
Sort Field 6-7

FASHION AND FABRIC DESIGN BY PRODUCT

C Cloth yardage, machine made
D Costume
Prefer over other terms in this list.
E Costume accessories
But not Jewelry. See Minor Arts on following page.
F Handwork: construction of fabric
G Crocheting
H Knitting
J Lacemaking
K Weaving
M Handwork: embellishment of fabric
N Dyeing
P Embroidery
R Other stitchery
S Printing
T Quilting
U Leatherwork
W Paper fabrics, wallpaper
X Tapestry
Y Tapa cloth
Z Other

Further subdivide (especially costume) by material as follows:

.E Fabrics of natural products
.F Fibers and other plant by-products
.G Fur
.L Leather, hides, skins
.M Metal (i.e. metal fabrics)
.O Paper
.P Plastic
.Q Rubber
.U Synthetic fabrics
.Y Mixed materials (none clearly dominant)
.Z Other or unknown material



MINOR ARTS IN OTHER MATERIALS BY PRODUCT

A Appliances
B Arms and armor
but not armored vehicles
C Coins, medals, seals
D Clocks, watches, timepieces
E Communication devices
F Containers, packaging
G Furniture and household furnishings other than those listed elsewhere
H Household implements, flatware, cooking utensils, etc.
I Inventions (fantastic or unsuccessful)
J Jewelry
K Liturgical objects
L Lighting devices
M Machinery
N Miniatures
P Musical instruments
Q Sports equipment
S Scientific equipment
T Toys, playthings
U Tools
V Vehicles: air
W Vehicles: land
X Vehicles: water
Z Other

Further subdivide by dominant material as follows:

.A Animal by-products other than specific ones listed below
.B Bone, horn, shell
.C Clay
.D Concrete, cement, plaster
.E Fabrics
.F Fibers and other plant by-products
.G Fur
.H Glass
.I Ivory
.K Lacquer
.L Leather, hides, skins
.M Metal
.N Paper
.P Plastic

99

ART -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

MINOR ARTS BY MATERIAL *(continued)*

.Q Precious and semi-precious stones, gems
.R Rubber
.S Stone
.T Synthetic materials
.V Wax
.W Wood
.Y Mixed materials (none clearly dominant)
.Z Other materials

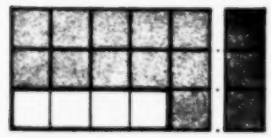
ART THEORY, COMMERCIAL ART, THEATER ARTS BY TECHNIQUE

A Color theory
B Pigmental systems
C Prismatic systems
E Design and composition theory
F Elements of design
G Principles of design
H Optical illusions
J Perspective
K One point
L Two point
M Three point

N Commercial and advertising art
P Advertising
Magazine, billboard, television, etc.
Q Caricature, cartooning, political satire
R Display
Museum, retail, household, flower arranging, etc.
S Illustration
Magazine, program, poster, etc. but not book (see Book Arts)
T Packaging design

V Theater arts
W Costuming
X Makeup
Y Stage design

ART: TITLE
Class Notation



Sort Field 8

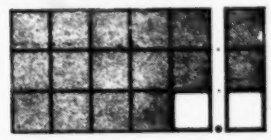
ART -- TITLE

Period
Country
Medium
Style
Origin
Subject
Subdivision of Subject
Subdivide by Title of Work

Use standard three-place Cutter table to represent the title of the work. Every work must have a title, even though it is titled "Untitled", or a descriptive title must be assigned to it. Cutter portraits to the surname of the subject regardless of how the portrait may have been named. In architecture, invert such titles as "Temple of..." and "Cathedral of..." where the generic term has already been assigned a subject code in Field 7; Cutter to the most significant word following the generic term.

It is well to standardize practice by either using all titles in their language of origin, or by translating all titles into English.

ART: DETAIL
Class Notation



Sort Field 9-10

ART -- DETAIL NUMBERS

Period
Country
Medium
Style
Origin
Subject
Subdivision of Subject
Title
Subdivide by Detail Number

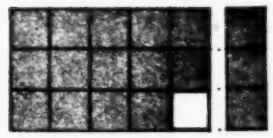
A-Z DETAIL NUMBER
Use this field to denote differing views of the same work of art which, up to this field, have identical call numbers. This field accommodates 26 views of the same work.

.A-Z ADDITIONAL DETAIL NUMBER
Use of this field increases the accommodation of a single work to 676 views.

Special schedules may be created for these two fields in order to place details of a major art monument in a logical sequence, e.g. Ghiberti's Gates of Paradise. An example of a special schedule is given on the following page -- one which places parts of buildings in a logical sequence. To be used with Architecture.

ART -- DETAIL NUMBERS

ART: DETAIL
Class Notation



Sort Field 9

Optional use of Field 9 suggested for Architecture. Subdivide by part of building illustrated. Use terms appropriate to the Period.

(EXTERIOR)

A Site, distant view, general view, air view
B Facade, front, or west side of building
C Right side, or south side of building
D Back, rear, or east side of building, apse, chevet, choir, haram, mihrab
E Left side, or north side of building
F Entrance, portal, doorway, gateway, porch, pylon, propylaea
G Adjacent areas, courtyard, atrium, chapter house, pavilion, sahn, chaburi
H Rooftop, domes, towers, spires, crenellations, geodesic domes, gambays
I Structural details, pediment, capital, columns, piers, gable, guldasta

(INTERIOR)

J Entry, lobby, narthex, pronaos, vestibule, reception hall, astanah
K Major interior space, nave, hypostyle hall, cella, chaitya, drawing room
L Minor interior spaces, vaults, choir, apse, tribune, chevet, altar
M Other living spaces, dining, bedroom, bath, kitchen, study, library, office
N Horizontal circulation, aisles, corridors, halls, colonnade, arcade, mandapa
O Vertical circulation, stairs, elevators, escalators
  Also: crypts, basements, cellars, balconies
P Ceilings
  Use only if above categories do not apply.
Q Floors
  Use only if above categories do not apply.
R Structural details, decorative elements, false doors, pediments, columns
S Other functional details, windows, doors, lighting, plumbing

(PLANNING AND CONSTRUCTION ASPECTS)

T Under construction
U Models, color palettes, building materials

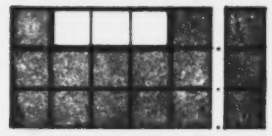
SCIENCE:COUNTRY
Class Notation



Sort Field 2

SCIENCE -- COUNTRY AND GEOGRAPHICAL DIVISIONS

Science Group
Subdivide by Country

001-999 *Use the schedule for HISTORY--COUNTRY AND GEOGRAPHICAL SUBDIVISIONS (See pages 25-38)* as appropriate *to identify the geographical location of some physical feature, the national locus of some scientific phenomenon, or the nationality of a scientist being pictured.*

Note, however, that much of the material classed in SCIENCE should be representation of scientific theory and principle that is incapable of geographic assignment. To these assign the geographic number 000.

This Field is applied to the visual content of the picture being classified and not to the place where the picture was taken. Use the number 001 (Extra-terrestrial) to identify pictures of stars, planets, the moon, or other astronomical bodies. A picture of an observatory, on the other hand, should be identified by the geographical number for its country.

SCIENCE:SUBJECT
Class Notation

SCIENCE -- SUBJECT DIVISIONS SUMMARY *(continued)*

MEDICAL SCIENCES

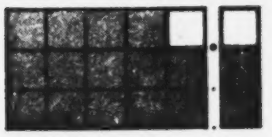
- A Anthropology
- B Anatomy
- C Anaesthesiology
- D Dentistry
- E Dermatology
- F Endocrinology
- G Epidemiology
- H Geriatrics
- J Histology
- K Immunology
- L Neurology
- M Obstetrics and Gynecology
- N Optometry and Ophthalmology
- P Orthopedics
- Q Pathology
- R Pharmacology
- S Psychiatry and Neuropsychiatry
- T Radiology
- U Surgery
- V Toxicology
- W Urology
- Z Other

TECHNOLOGICAL RESEARCH AND ENGINEERING

- A Aeronautical engineering and research
- C Agricultural engineering and research
- E Chemical engineering
- G Civil engineering and research
- J Electrical engineering
- M Mechanical engineering and research
- R Reprographic technology

See following pages for detailed subdivision schedules for the above subjects.

SCIENCE:SUBJECT
Class Notation



Sort Field 3-4

SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS

Science Group
  Country
    Subdivide by Subject

MATHEMATICS BY SUBJECT

A ARITHMETIC
- .A Numbers, number theory
- .F Fractions
- .R Roots

C ALGEBRA
- .E Equations
- .I Irrational numbers
- .L Logarithms
- .V Vector analysis

E ANALYSIS
- .D Differential calculus
- .I Integral calculus

G GEOMETRY
- .A Analytical geometry
- .D Descriptive geometry
- .E Euclidean geometry
- .F Anti-Euclidean geometry
- .P Plane geometry
- .S Solid geometry
- .T Topology

J TRIGONOMETRY
- .P Plane trigonometry
- .S Spherical trigonometry

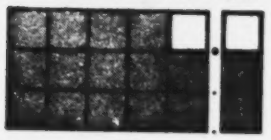
S STATISTICS

Class statistics of any particular subject with that subject in HISTORY or elsewhere in SCIENCE. Include here only the theoretical aspects and methods of Statistics, not their application.

- .P Probability theory
- .S Sampling

W WEIGHTS AND MEASURES

SCIENCE:SUBJECT
Class Notation



Sort Field 3-4

SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

ASTRONOMY AND SPACE SCIENCES BY SUBJECT

A ASTRONOMY

.A Astronomical instruments
Include telescopes, cameras, recording devices and timekeeping instruments.

.C Comets and meteors

.E The earth (as a planet)
See also Earth Sciences.

.G The galactic system

.H Galaxies

.M The moon

.P Planets

.R Stars

.S The sun

C SPACE SCIENCE
Class all material depicting manned space flight, from launch to recovery, by series, as follows:

.A Mercury

.B Gemini

.C Apollo

.H Vostok

.I Voskhod

.J Soyuz
Class material relating to preparation for manned flights or all material pertaining to unmanned flights as follows:

.O Artificial satellites, unmanned spaceflight operations
Include flights "manned" by animals.

.Q Cosmic, solar radiation

.R Engines, propulsion

.S Flight simulation, training

.T Ground support, control, guidance

.U Life support systems

.V Materials research

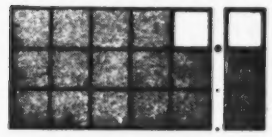
.W Spacecraft design and construction

.X Trajectory, orbit, reentry
Include theoretical aspects only, not operational.

.Y Weightlessness

L LUNAR EXPLORATION
Include information about the moon gained by fly-by, orbiting or lunar landing. Class information about the space flight in Space Science (C) above. Divide like Earth Sciences as appropriate.

M MARS EXPLORATION
Include information about Mars gained by fly-by or orbiting. Class information about the flight in C above. Divide like Earth Sciences as appropriate.



SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

EARTH SCIENCES BY SUBJECT

C CARTOGRAPHY, GEODESY
- .A Cartography, the art of map-making
  Do not include maps; class these in HISTORY in the appropriate Country and Subject. Include here only the methodology of creating and producing maps.
- .B-T *May be assigned to particular techniques of map projection.*
- .U Dimensions, mass, density of the earth
- .W Latitude and longitude
- .Y Measurement of altitudes of surface features

G GEOGRAPHY
Use only if intent is to illustrate a typical or theoretical land formation. Prefer HISTORY as the primary locus of geographical illustrations if the actual location can be identified.
- .G Beach, coastline
- .K Plains, prairies
- .L Hills, foothills
- .M Mountains
- .P Plateaus
- .Q Caves, caverns
- .S Valleys, watershed systems
- .T Canyons, gorges, ravines
- .V Rivers, streams, running water
- .W Waterfalls
- .Y Standing bodies of water, lakes, ponds
- .Z Glaciers

J GEOMORPHOLOGY
Include instruments in appropriate subdivisions.
- .C Creep solifluction
- .E Earthquakes, seismology
- .F Exfoliation
- .G Glacial erosion
- .L Landslide (not associated with earthquake)
- .P Soil zones, weathering rinds
- .S Stream, running water erosion
- .T Sub-surface water erosion
- .V Volcanic action, volcanic forms
- .W Wave erosion (shoreline)
- .Y Wind erosion

SCIENCE:SUBJECT
Class Notation

Sort Field 3-4

SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

EARTH SCIENCES BY SUBJECT *(continued)*

P PETROLOGY

Prefer HISTORY--Mineral Resources if the emphasis is upon the economic importance of ores or minerals.

.I Igneous rock
.J Plutonic rock
.K Volcanic rock
.M Metamorphic rock
.S Sedimentary rock

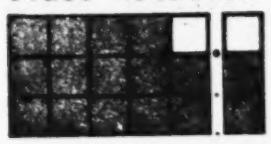
The processes of sedimentation are dealt with in S below.

S SEDIMENTOLOGY AND STRATIGRAPHY

.B Bedding or stratification
.C Current bedding, cross bedding
.D Delta structures
.F Formations
.G Grading
.M Mudflows
.P Reef structures
.R Ripple marks
.S Scour and fill
.U Slump overfolds
.V Sorting
.W Water dunes
.Y Wind dunes

T STRUCTURAL GEOLOGY

.A Anticlines and synclines
.C Deformations
.D Dislocations
.F Faults
.H Folds
.J Joints
.M Microscopic structures
.O Outcrops
.S Schistosity
.X Strikes and lineaments



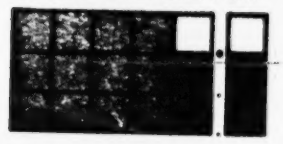
SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

EARTH SCIENCES BY SUBJECT *(continued)*

W METEOROLOGY
Include instruments in appropriate subdivisions.
- .A Atmospheric chemistry
- .C Atmospheric optics, rainbows, sunsets
- .E Atmospheric pressure, density of air
- .G Air currents, winds
- .J Cyclonic storms
- .L Electrical, thunder storms
- .M Moisture, clouds, fog
- .P Precipitation, rain, snow
- .T Temperature
- .W Weather prediction

Y OCEANOGRAPHY
Include instruments in appropriate subdivisions.
- .C Chemistry of sea water
- .D Density of sea water, pressure
- .F Depth, sounding
- .O Ocean currents
- .S Sedimentary deposits
- .T Temperature
- .U Tides
- .V Velocity of sound in water
- .W Wave action, fluid mechanics

SCIENCE:SUBJECT
Class Notation



Sort Field 3-4

SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

PHYSICAL SCIENCES BY SUBJECT

C CHEMISTRY

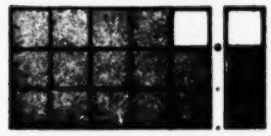
Include instruments in appropriate subdivisions.

.A Alchemy
.B Analytical chemistry
.D Biochemistry
.E Crystallography
.F Electrochemistry, magnetochemistry
.I Inorganic chemistry
.M Mineralogy
.O Organic chemistry
.P Photochemistry
.R Radiochemistry
.T Thermochemistry

P PHYSICS

Include instruments in appropriate subdivisions.

.A Acoustics, sound
.E Electricity and magnetism
.H Heat, thermodynamics
.L Light, optics
.M Mechanics
.N Mechanics of fluids
.P Pneumatics, mechanics of gases, aerodynamics
Except aeronautics, the science of flight -- class in Technological Research and Engineering.
.S Nuclear physics
.U Quantum theory
.W Relativity
.Y Solid state physics



SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

LIFE SCIENCES BY SUBJECT

Include in Life Sciences all aspects of life except *human life. Class all aspects of human life in Medical Sciences (W).*

B BIOLOGY

Include those aspects that are equally applicable to both plant and animal life.

- .A The energy cycle
- .C Cytology, cells
- .E Evolutionary theory
- .G Genetics
- .O Origin of life theories
- .R Reproduction
- .S Symbiosis

G BOTANY

Subdivide by taxonomic Division. Note: general collections having an interest in only the common names of plants will prefer to class flora in HISTORY--Geography.

- .B Bryophyta
- .C Cryptogamia
- .D Dicotyledones
- .G Gymnospermae
- .M Monocotyledones
- .P Pteridophyta
- .S Spermatophyta
- .T Thallophyta
- .U Tracheophyta

H PALEOBOTANY

Subdivide like Botany.

L ZOOLOGY

Subdivide by Sub-kingdom. Note: general collections having an interest in only the common names of animals will prefer to class them in HISTORY--Fauna or Fish.

- .A Protozoa
- .E Mesozoa
- .P Parazoa
- .T Metazoa

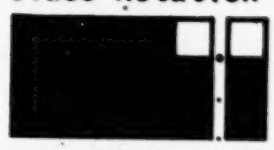
M PALEOZOOLOGY

Subdivide like Zoology.

V VETERINARY SCIENCES

Subdivide (as appropriate) like Medical Sciences.

SCIENCE:SUBJECT
Class Notation



Sort Field 3-4

MEDICAL SCIENCES BY SUBJECT
Include all biological aspects of human life in Medical Sciences. Prefer HISTORY--Medical Services for those aspects of medicine that depict social conditions and vocation rather than the purely scientific.

A ANTHROPOLOGY (PHYSICAL)
- .B Comparisons with other life forms
- .C Comparative measurements and traits among men
- .E Evolutionary theory
- .F Fossil men
- .H Human genetics

B ANATOMY
- .B The body as a whole
- .C Integumentary system
- .D Musculo-skeletal system
- .E Respiratory system
- .F Circulatory system
- .G Hemic and lymphatic systems
- .H Digestive system
- .J Urogenital system
- .K Endocrine system
- .L Brain and nervous system
- .M Sense organs

C ANAESTHESIOLOGY

D DENTISTRY

E DERMATOLOGY

F ENDOCRINOLOGY

G EPIDEMIOLOGY

H GERIATRICS

J HISTOLOGY

K IMMUNOLOGY

L NEUROLOGY

M OBSTETRICS AND GYNECOLOGY

N OPTOMETRY AND OPHTHALMOLOGY

SCIENCE:SUBJECT
Class Notation

Sort Field 3-4

SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

MEDICAL SCIENCES BY SUBJECT *(continued)*

P ORTHOPEDICS

Q PATHOLOGY

Divide by cause of the disease.

.C Circulatory disturbance
.D Disturbance of innervation or psychic control
.G Genetic or prenatal influence
.H Higher order parasites (fungus, worms, venoms, etc.)
.J Lower order parasites (bacteria, viruses, etc.)
.L Intoxication
.M Metabolic disorder, malnutrition
.N New growths
.S Static mechanical abnormality
.T Trauma or physical agent
.U Uncertain cause with a functional reaction
.V Uncertain cause with a structural reaction
.Z Others

R PHARMACOLOGY

S PSYCHIATRY AND NEUROPSYCHIATRY

T RADIOLOGY

U SURGERY

V TOXICOLOGY

W UROLOGY

Z OTHER

SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

TECHNOLOGICAL RESEARCH AND ENGINEERING BY SUBJECT

A AERONAUTICAL ENGINEERING AND RESEARCH
Class space flight, i.e. flight no longer dependent on the lifting property of air, in Astronomy and Space Sciences. Prefer HISTORY--Transportation for operational aspects of flying. Prefer ART for aesthetic design aspects.
.A Aerodynamic design and testing, heavier-than-air craft
.B Lighter-than-air craft
.C Non-powered devices such as parachutes, kites, etc.
.D Vertical takeoff craft
.E Engines, propulsion
.F Flight simulation
.I Instrumentation, navigation
.N Study of natural flight (birds)
.S Supersonic flight
.T Traffic control

C AGRICULTURAL ENGINEERING AND RESEARCH
Class operational aspects of Agriculture in HISTORY.
.E Erosion control
.F Farm machinery
.H Feeds
.J Fertilization, soil nutrients
.L Hybridization, experimental breeding
.M Irrigation
.W Weed & pest control

E CHEMICAL ENGINEERING
.A Artificial food products
.D Drugs, cosmetics
.E Explosives
.J Fuels
.N Paints, varnishes, etc.
.P Petroleum products other than fuels
.S Synthetics, plastics

G CIVIL ENGINEERING AND RESEARCH
Class actual construction and other operational aspects in HISTORY.
.A Air pollution control
.B Building and structural engineering
Prefer ART for architectural design.
.D Desalinization of water
.E Engineering drawing
.H Highway engineering
.R Railway engineering
.S Sanitary engineering
.T Surveying
.V Testing of materials
.W Waterway engineering

SCIENCE -- SUBJECT DIVISIONS AND SUBDIVISIONS *(continued)*

TECHNOLOGICAL RESEARCH AND ENGINEERING BY SUBJECT *(continued)*

J ELECTRICAL ENGINEERING
Class operational aspects of utilities and communications in HISTORY.
.B Illumination
.D Power generation
.F Power transmission and distribution
.H Other electrical devices and systems
.J Computer science
.L Electronic memory devices
.N Programming and languages
.P Unit record data processing techniques
.Q Radar/sonar, detection devices
.R Radio/television communications
.T Telephone/telegraph communications
.V Other electronic devices and systems

M MECHANICAL ENGINEERING AND RESEARCH
Class operational aspects of transportation and other mechanics in HISTORY.
.A Acoustical engineering
.C Air conditioning, heating
.D Automotive (mechanical) design
Prefer ART--Minor Arts for aesthetic design aspects of automobile design.
.E Automotive safety engineering
.F Collision research
.H Engines, propulsion
.N Naval architecture
.O Hydrofoil craft
.P Hover craft
Prefer ART--Minor Arts for aesthetic aspects of boat design.
.R Railroad (mechanical) design
.T Rapid transit systems
.Z Other machinery

R REPROGRAPHIC TECHNOLOGY
.B Blueprinting
.C Cinematography
.M Microfilm processes
.P Photoengraving
.T Photography
See also ART--Photography
.W Rapid photocopy processes

SCIENCE -- PRIMARY KEY WORD

Science Group
  Country
    Subject
      Subdivision of Subject
        Subdivide by Primary Key Word

See HISTORY--Primary Key Word (page 51) for the basic explanation of the use of this Field. Assign numbers from the Cutter-Sanborn Three-place Table to the key word best describing the content of the picture. See also Field 8.

Special schedules have been created for listing in this Field the taxonomic Families under Botany and Phyla under Zoology. See the following pages.

For the other sciences the use of published thesauri (examples listed below) is recommended. These will serve as authority files of acceptable and standardized terms.

BIOLOGICAL AND AGRICULTURAL INDEX
New York, H. W. Wilson Company (monthly)

ENGINEERS JOINT COUNCIL
Thesaurus of engineering terms; a list of engineering terms and their relationships for use in vocabulary control in indexing and retrieving engineering information. 1st Ed.
New York, 1967. 690 p.
(Useful for all Sciences, not just Engineering)

NATIONAL CONFERENCE ON MEDICAL NOMENCLATURE
Standard nomenclature of diseases and operations. 5th Ed.
[by] Edward T. Thompson and Adaline C. Hayden.
New York, McGraw-Hill, 1961. 964 p.

U.S. NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. SCIENTIFIC AND TECHNICAL INFORMATION DIVISION
NASA Thesaurus; subject terms for indexing scientific and technical information. Prelim. Ed.
U.S. Government Printing Office, 1967. 3 volumes
(Useful for all Sciences, not just Aeronautics)

      Subdivision of Subject
        Primary Key Word

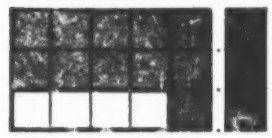
No suggestion is made for the use of these Fields except in Zoology.

In the area of Zoology, these Fields may be used to insert a partial code for Class and Order -- Class in Field 6 and Order in Field 7. Group together all Classes beginning with the letter "A" under A in Field 6; Classes beginning with "B" under B, etc. Treat Order in the same fashion in Field 7.

Suggested authority for Zoological nomenclature is:

BLACKWELDER, Richard Eliot
Classification of the animal kingdom.
Carbondale, Southern Illinois University Press, 1963. 94 p.

SCIENCE:KEY WORD
Class Notation



Sort Field 8

SCIENCE -- SECONDARY KEY WORD

Science Group
  Country
    Subject
      Subdivision of Subject
        Primary Key Word

Subdivide by Secondary Key Word.

See Primary Key Word (Field 5) for the full explanation of the use of this Field. With the exception of Botany and Zoology, the use of a secondary key word is recommended for all other Sciences.

In Botany and Zoology assign a Cutter number to the first word of the accepted taxonomic binomial (genus-species). Suggested authority lists are listed below:

BLACKWELDER, Richard Eliot
Classification of the animal kingdom.
Carbondale, Southern Illinois University Press, 1963. 94 p.

DALLA TORRE, Karl Wilhelm von
Register su de Dalla Torre et Harms Genera siphonogamarum ad systema Englerianum conscripta.
Weinheim, H. R. Engelmann (J. Cramer) 1958. 568 p.

APPENDIX I

EXPANDED CUTTER TABLE FOR "S"

Treat Saint, San, Santa, and any other variation on the word Saint as though spelled simply "S." All Saints will file together ahead of any other word beginning with S. This Table supercedes the standard Cutter-Sanborn Table through S159. Examples: Santa Maria S082, San Miguel S091, Saint Peter S103.

SAINTS

S 001 Aa	S 041 Dis	S 081 Mac	S 121 Su

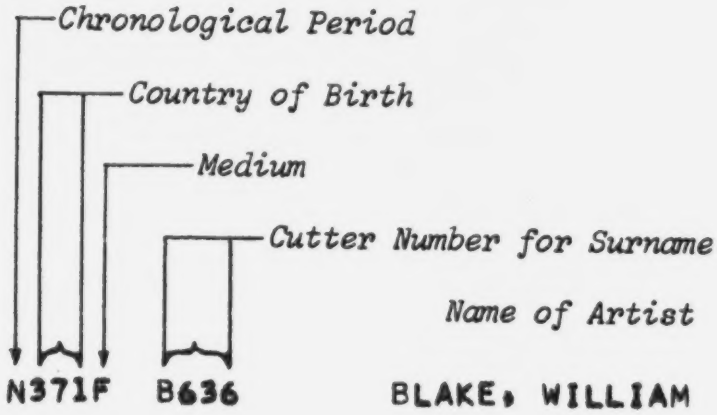
Resume use of Standard Table.

APPENDIX II

AUTHORITY LIST FOR ARTISTS' NAMES

This authority list, containing over 4000 of the most commonly used artists' names, has been prepared as a primary classification tool, yielding in one "look-up" four different facets of information necessary to the construction of a complete call number -- chronological period to which the artist is assigned, the country of his birth, the Cutter number for his name, and a standardized spelling for his name. Also listed are his dates and the media in which he worked, facts which may help in determining that it is the right individual. Artists are normally classed in the country of their birth and the century of their death. The simplicity and directness of using these readily ascertained facts about an artist outweigh, in most cases, the desirability of placing a man elsewhere on the basis of subjective judgement about where or when he did his most important work.

Information on the following pages is arranged like the sample shown below:



Abbreviations used in the date column:

ACT.	Active
B.	Born
C.	Circa
CT	Century
D.	Died

Suggested published authorities for biographical information on artists:

MALLETT, Daniel Trowbridge
Index of artists, international-biographical; including painters, sculptors, illustrators, engravers and etchers of the past and present. New York, P.Smith, 1948.

Supplement. 1948

THIEME, Ulrich
Allgemeines Lexikon der bildenden Künstler von der Antike bis zur Gegenwart; unter Mitwirkung von 300 Fachgelehrten des In- und Auslandes hrsg. von Ulrich Thieme und Felix Becker. Leipzig, E.A.Seeman, 1907-50. 37 volumes.

INDEX

Entries in Roman type refer to terms in the main body of the work, i.e. the Classification Schedules. The initials H, A and S identify the three main divisions of the Classification -- History, Art and Science. Example:

animals(H)39-40,(A)97,101,104,(S)138-139,143

Thus, a classifier dealing with pictures of animals in a geographical/historical/cultural context should turn to the references following H -- with animals as the subject matter of art, to the references following A -- with animals as the subject of scientific study, to the references following S.

Entries in *Italic type* refer to topics discussed in the introductory chapters, "The Need for a New Classification" and "A Suggested Method of Automatic Indexing".
